

Here Comes Spring!!!

Spring is moving in and so are ticks!

We've already pulled off a couple of these creeps this week! As the warmer weather approaches, don't forget to start your flea & tick preventative. These little pests are desperately searching for a warm body, and they like to hang out in the brush waiting for a furry host. While we personally prefer not to use chemicals on our pets, we feel the prevention of tick-born diseases for us and our furry kids is very important. If you would like more detailed information regarding flea & tick preventatives, please feel free to ask us about it at your next appointment, or send us an e-mail. We carry Frontline Plus & Advantix, so just let us know if you need to stock up. We usually have every size available, but a quick e-mail to let us know what you'll need is always appreciated. We also carry a great tick remover...

Spring also means short haircuts....

It is very common to give your dog a nice short haircut for the warmer months. This can be beneficial for keeping body temperatures more comfortable as well as ease of cleaning and finding ticks. If your dog does not usually get a haircut, but will need one at their next appointment, please let us know in advance so that we may schedule the appropriate amount of time. We run a pretty tight schedule and may not be able to accommodate a haircut appointment without notice.

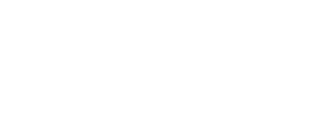

Interested in Pet First Aid?

According to the American Animal Hospital Association, 25% more pets COULD have been saved if only ONE pet first aid technique was applied prior to veterinary treatment. Knowing pet first aid can be the difference between life and death, between temporary and permanent disability and between a short recovery and a long recuperation. For all our pets do to enrich our lives, we should be prepared to help them when an emergency arises. For more information, [click here](#).

If you have an older dog who needs a helping hand moving around, we recommend the "HELP 'EM UP HARNESS"

Most of you have already met our 2nd official mascot, Penny

Penny

Penny came home to us from DAWS on Halloween and is about 4 1/2 years old and a total sweet-heart! She has a lot of that Beagle stubbornness making her a little harder to train than Parker. We believe she used to do quite a bit of rabbit hunting as her instincts to run off into the brush are very sharp! She and Parker are now best friends and just love to be together. Penny has clearly been a mommy to many puppies in her life, which has given her a great motherly instinct that can make any nervous dog more comfortable about being in the van.

Support Shelters!!!!

Both of our pups came from DAWS. DAWS always has a wide selection of pets needing homes because they partner with other shelters across the country to save pets from euthanasia. DAWS always welcomes donations—whether it's your time, money, or pet necessities. Right now, they really need cat food and any linens you can spare. If you have items to donate, we can take them to DAWS for you.

[Visit DAWS.org for more information](#)

Did you know....?

...that proper dental hygiene can lengthen your dogs' life expectancy by up to one-third!?!? Teeth brushing as well as providing a variety of chewing items are integral to your dog's dental hygiene.
